www.bcaenergy.com.au

David's tertiary qualifications and 20 years' experience with power systems, and energy management allow him to undertake high quality building energy assessments for a range of commercial and residential projects. His experience has been gained from over 40 years working in the electricity and energy sectors across NSW.

David specialises in BASIX Certification for Class 1 and Class 2 residential buildings in NSW and Residential Thermal Analysis for dwellings across Australia using BERS Pro and FirstRate 5. He also provides information on reducing energy use and providing realistic solutions to improve a building's overall energy performance.

David regularly presents training sessions for CPD points on behalf of national industry bodies and has forged a reputation as a highly informative public speaker at industry events and forums across Australia.
